

Intermediate Palletized Paint Striper 320 Air-Atomized or Air Spray

This self contained pavement marker is designed for a single operator/driver, complete with hand held gun controls for easy operation from the vehicle cab. Convenient carriage assembly is designed for attachment to either side of the vehicle for centerline or edge-line striping. With the Model 320 and MB's skip line timer, you can stripe solid or skip line patterns in two different colors. A pivot point allows the carriage assembly to be folded vertically to provide convenient storage, and makes transportation to and from the job site easier than ever.

FEATURES

- Single operator system
- Paint and bead gun controls from truck cab or operator's seat
- Appropriately matched paint and bead tank capacities
- Operator's seat
- Air lift deploy carriage assembly
- Two 20-gallon paint tanks
- Solid state skip line timer
- All tanks A.S.M.E. rated
- Paint shut-off valves and air safety relief valves
- Independent engine for air compressor
- Heavy-duty electric controlled paint spray guns
- Carriage pivots for centerline or edge-line striping
- Allows travel at highway speeds between jobs

PAINT SYSTEM FEATURES

- Air Atomized System
- Two, 20-Gallon A.S.M.E. Paint Tanks
